SUMMARY

Software Developer with nearly 2 years of experience developing and maintaining scalable web applications using JavaScript, Node.js, Express.js, Angular, and MongoDB. Proven experience in API development, database design, third-party integrations, production support, and cloud deployments. Passionate about building reliable software, solving complex technical challenges, and continuously improving engineering skills.

TECHNICAL SKILLS

Programming Languages	: JavaScript, TypeScript
Frontend Technologies	: Angular, NgRx, RxJs, HTML5, CSS3, Bootstrap, Angular Material UI
Backend Technologies	: Node.js, Express.js, MongoDB, PostgreSQL, MVC, Repository Pattern
DevOps and Deployment	: Docker, CI/CD, AWS EC2, AWS S3, Nginx, Route53, SSH, PM2, Cloudflare
Tools and Libraries	: Git, GitHub, GitLab, Postman, Multer, Nodemailer
Integrations	: JWT, Google Auth, Socket.IO, Stripe, Razorpay, Mollie, Firebase, Chart.js
Familiar with	: Data Structures and Algorithms, Google Cloud

EXPERIENCE

Software Developer - Team Tweaks Technologies

Oct 2024 – May 2026

- Developed and maintained scalable RESTful APIs using **Node.js, Express.js, and MongoDB** for a production platform serving web and mobile applications.
- Built and enhanced **Angular**-based administrative dashboards for managing users, interpreters, campaigns, invoices, and platform settings.
- Developed and maintained business-critical integrations and workflow automation features, including **Mollie** payment processing, **webhook** handling, and configurable **flow control** mechanisms.
- Integrated Firebase Cloud Messaging (**FCM**) and third-party services to support notifications and business workflows.
- Implemented and maintained Angular Server-Side Rendering (**SSR**), improving application performance, SEO, and initial page load experience.
- Executed database schema updates, data migrations, and data correction scripts while ensuring production data integrity.
- Investigated and resolved production issues across frontend, backend, and database layers.
- Implemented dynamic **sitemap.xml** and **robots.txt** generation to improve **SEO** and search engine indexing.
- Managed deployments across staging and production environments using **PM2, Linux servers, Cloudflare**, and **CI/CD** pipelines.
- Collaborated with developers, QA teams, and stakeholders to deliver client-requested features and platform enhancements.

PROJECTS

CareerVilla - Job Portal Application

[Live Link](#) |  GitHub - [Frontend](#) | [Backend](#)

CareerVilla is a robust job portal application designed to connect job seekers with employers seamlessly. It offers features for posting and browsing job listings, managing applications, and tracking job search progress.

- Developed a full-stack job portal application using **Angular, Node.js, Express.js, and MongoDB**.
- Implemented **JWT** authentication, **Google OAuth**, and role-based access control.
- Integrated **Stripe** payment gateway for secure subscription and payment processing.
- Integrated **Socket.IO** for real-time communication and **Firebase** for image storage.
- Containerized the application using **Docker** and implemented **CI/CD** workflows.
- Deployed the application using **AWS EC2, Nginx, and Vercel**.

EDUCATION

Full Stack Development

2023 - 2024

Brototype, Calicut

BCA - Bachelor of Computer Application

2019 - 2022

Calicut University

CGPA: 6.192
